

Environment

AGENCY OVERVIEW

Agency Description

The Department of the Environment is responsible for the operation of the County’s solid waste disposal and recycling activities, oversight of contract refuse collection and planning, policy development and coordination with other agencies regarding water quality, stormwater management, sludge and solid waste management, tree preservation and other environmental issues. The Department also has responsibility for the enforcement of a variety of County laws relating to: (1) sediment and erosion control, (2) stormwater management and (3) animal control.

Needs Assessment

The primary factor taken into consideration during the development of the CIP is how to best implement the County’s 10-year Solid Waste Plan. Other considerations include the necessity for the future expansion of the Solid Waste Management Program to meet future demand, demographic changes and the need to improve the Animal Management programs.

FY 2021 Funding Sources

- Revenue Bonds – 100.0%

FY 2021-2026 Program Highlights

- For the Resource Recovery Park, the FY 2021 program continues funding renovations at the Missouri Avenue Convenience Center.

- For the Brown Station Landfill, the FY 2021 program includes funding to fill in Area C, extending the County’s landfill capacity to the year 2045 and to continue the design for upgrades to the existing Leachate Pretreatment Facility as required by the regulatory arm of WSSC.
- For the Sandy Hill Sanitary Landfill, the FY 2021 program includes funding for post-closure care requirements associated with regulatory compliance, as well as various cap repairs and groundwater management at this facility.
- For the Materials Recycling Facility, the FY 2021 program includes funding to install an optical sorter for plastics and upgrading equipment.
- FY 2021 funds support the completion of the stormwater pond reconstruction, located at the Organics Composting Facility, as required by the Soil Conservation District.

NUMBER OF PROJECTS = 6							

Description: This project includes: Brown Station Road Sanitary Landfill Area C in-fill, extending the County's landfill capacity to the year 2045, leachate pre-treatment facility upgrades, Phase V Landfill Gas, Area B Stormwater Control Structures, Cabin Branch stream crossing, two and a half miles of landfill gas pipeline replacement and various infrastructure projects.

Justification: This project provides for continued operational and regulatory compliance and funding for major compliance projects mandated by the United States Environmental Protection Agency (US EPA), the Maryland Department of the Environment (MDE), the Washington Suburban Sanitary Commission (WSSC) and the Public Service Commission.

Highlights: In the FY 2021 CIP, funding will be used to continue the design of the Landfill Area C in-fill project and replacement of the main pipeline along Brown Station Road that distributes methane gas, which is converted to energy for the County Correctional Facility.

Enabling Legislation: Not Applicable

Description: This project includes the completion of a plastics optical sorter, commercial truck weighing scale, glass removal equipment, paving of facility parking lot and operational inbound and outbound road, roof repair and tipping floor repairs. The installation of the sorter will provide increased commodities revenue for plastics and ensure accurate weights for manifests and tipping fees.

Justification: The Materials Recycling Facility (MRF) plays a pivotal role with the expected goals and successes of the residential and commercial recycling programs, waste diversion and resource recovery in Prince George's County.

Highlights: In FY 2021, funding is included to complete the installation of the plastics optical sorter and other facility upgrades.

Enabling Legislation: Not Applicable

Description: In 2014, an ad-hoc committee was formed consisting of representatives from College Park, Greenbelt, Berwyn Heights, and the County to discuss the need for additional animal management services to supplement and improve services provided by the County and municipalities in the north/northwestern part of the County.

Justification: Currently the County operates one full-service open admission animal shelter in Upper Marlboro that takes approximately 10,000 animals per year and serves the entire County. However, the north/northwestern area of the County has the highest number of licensed pets, the highest adoption rates and the highest demand for services.

Highlights: The project is delayed to start in FY 2022.

Enabling Legislation: CB-47-2014

Description: This project includes 3,000 organics residential collection carts and facility needs, which improves the combined yard trim and food scrap curbside collection program. Funding will procure equipment that will facilitate effective materials processing. This project also includes stormwater management pond reconstruction.

Justification: The County's organics composting facility includes the processing of food scraps, which plays a major role in increasing the diversion rate in the County. Composting turns organic waste into a popular soil amendment called Leafgro, generating revenue for the County.

Highlights: FY 2020 funding from the Blight Eradication Program has been transferred to support the Organics Composting Facility. FY 2021 funding supports the Soil Conservation District requirements for a stormwater management pond to be reconstructed to ensure compliance with surface water management over the 52-acre impervious area.

Description: This project includes a system for waste diversion within the County in accordance with the Resource Recovery Master Plan, Zero Waste Plan and the Comprehensive Ten Year Solid Waste Plan. Funding supports the North County Convenience Center, improved and increased residential services at the Brown Station Road Convenience Center and the Missouri Ave Convenience Center renovations.

Justification: Resource recovery is consistent with the principles of zero waste. This furthers the County's and Maryland's mandated recycling and waste diversion goals and conserves valuable landfill airspace while reducing environmental and financial impacts.

Highlights: FY 2021 funding supports upgrades needed for both Brown Station Road and the Missouri Avenue Convenience Centers.

Enabling Legislation: Not Applicable

Description: This project provides funding for construction infrastructure work at Sandy Hill Landfill required by the Maryland Department of the Environment (MDE) 2011 Consent Order and other necessary projects associated with earthen and geosynthetic cap repairs, replacement of non-performing gas wells and extraction components, groundwater cut off wall, repair of leachate conveyance system, and stormwater structures.

Justification: This project continues the County's objectives to maintain compliance with federal, state and local regulatory agencies.

Highlights: FY 2021 funding is for continued progress with design needs for post-closure care to include replacing of several monitoring wells and other compliance requirements.

Enabling Legislation: Not Applicable
