COMMENTS ON SALES COMPARISON

The comparables presented are considered the best available featuring design, appeal, condition, utility, and amenities similar to the subject property. Other comparables analyzed would require less desirable adjustments and were not utilized for that reason. The comparables recited are from the subject neighborhood, are in acceptable proximity to the subject, are recent, and the most comparable sale and listing found. All value affecting dissimilarities were adjusted according to market reaction. The indicated range of values brackets the value of the subject. Features regarding each comparable is listed below.

COMPARABLE #1: recent sale; in close proximity of subject and located in the same county; similar zoning as the subject; market reaction warrants a negative adjustment for the superior lot size compared to the subject; similar condition as the subject; similar development status as the subject;

COMPARABLE #2: recent sale; in close proximity of subject and located in the same county; similar zoning as the subject; market reaction does not warrant an adjustment for the difference in lot size; similar condition as the subject; similar development status as the subject;

COMPARABLE #3: recent sale; in close proximity of subject and located in the same city and county; similar zoning as the subject; market reaction does not warrant an adjustment for the difference in lot size; similar condition as the subject; similar development status as the subject;

All three comparable sales are over 1 mile from the subject property. This distance is farther than standard search parameters but it was necessary to expand this parameter to find comparables that were similar in overall appeal, design, condition, utility, and amenities. The sales presented were considered the best available.

The comparable sales used in this report have not all closed within the past 90 days of the effective date of the appraisal, and/or are within 1 mile of the subject. The comparables used were the best available to the appraiser, as of the date of the inspection.

Route 704 bisects the subjects market area. This thoroughfare, however, does not create any change in market conditions between the subject and any of the comparables.

The comparable sales selection search parameters/criteria included within 12 months of the date of inspection, located in Prince George's County, similar zoning as the subject and vacant land.

The site size adjustment for comparable sale #1 exceeds 10% of the actual sales price. It was necessary to use this comparable sale, because it was a recent sale, is located in the same city and county, and is close to the subject in site size.

The global outbreak of a "novel coronavirus" known as COVID-19 was officially declared a pandemic by the World Health Organization (WHO). The reader is cautioned, and reminded that the conclusions presented in this appraisal report apply only as of the effective date(s) indicated. The appraiser makes no representation as to the effect on the subject property of any unforeseen event, subsequent to the effective date of the appraisal.
